INSTRUCTIONS

- Attempt responses on the answer book only.
- Nothing is to be written on the question paper.
- Rough work or writing on question paper will be considered as use of unfair means.
- Tables / calculators are allowed / not allowed.

(CL0-1) Question 1: Cybersecurity professionals often work in large technology companies, but many successful cybersecurity startups have been created by individuals who identified new security threats and developed innovative solutions.

Explain why entrepreneurship should matter to cybersecurity students.

In your answer, discuss **two ways** entrepreneurial thinking can help cybersecurity professionals create value or new opportunities in the industry.

(CL0-2) Question 2: A student notices that many classmates complain about long waiting lines at the campus cafeteria during lunch time. The student thinks of creating a mobile app that allows students to pre-order food and pick it up quickly without waiting in line.

Using this scenario:

- a) Explain what part of this situation represents an **entrepreneurial idea**.
- b) Explain what conditions must be met for this idea to become a **real entrepreneurial opportunity**.
- c) Give one reason why the idea might fail to become a **successful opportunity**.

Question 3: In recent years, several trends have emerged: (10 Marks)

- (CL0-2)
- Increased remote work
 - Growth of digital payments
 - Rising demand for online education

A startup launches a platform that helps professionals quickly learn short technical skills through micro-courses delivered via mobile devices.

Questions

- a) Explain which **opportunity recognition pathway** best explains the emergence of this venture. (4 marks)
- b) Identify **two trends** that support the viability of this business idea. (3 marks)
- c) Explain how this startup addresses a **gap in the marketplace**. (3 marks)

(620-2)

Question 4:

A cybersecurity specialist working in a financial technology company notices that many small online retailers experience data breaches due to weak password practices and lack of basic security monitoring.

He proposes launching a startup that offers a low-cost subscription service that automatically scans websites for vulnerabilities, alerts business owners of security risks, and provides simple recommendations for improving security.

However, several large cybersecurity companies already offer advanced security products, and many small businesses rely on free security plugins instead of paid services.

Question (10 Marks)

Using concepts from the topic "Recognizing Opportunities and Generating Ideas", critically evaluate whether this startup idea represents a promising entrepreneurial opportunity.

In your answer, discuss:

- Whether the idea addresses a real and meaningful problem
 - Whether there is a clear target customer segment
 - The competitive challenges the startup might face
 - One factor that could increase the likelihood of success
-
