INSTRUCTIONS

- Attempt responses on the answer book only.
- Submit the question paper along with your answer sheet.
- Clearly mention the Question Number and Part Number before each answer.
- Marks will be awarded to idea, argument, clarity, and correctness of expression.
- Rough work or writing on question paper will be considered as use of unfair means.

Q.1. Revise the following sentences to be clearer and more concise:

CLO1 – C2 (10 Marks)

1. I am in receipt of your memo requesting an increase in pay and am of the opinion that it is not merited at this time due to the fact that you have worked here for only one month.
2. We hope to convey the following to our employees: a familiarization with the company's policies, teaching about procedures, and to know what they should do to file complaints if they have any.
3. It is expected that the new schedule will be likely announced by the company within the next day.
4. In this meeting, our intention is to acquire a familiarization with this equipment so that we might standardize the replacement of obsolete machinery throughout our entire work environment.
5. In lieu of further discussion, we want to state in the affirmative that what transpired was due to the fact that the vehicle had insufficient braking capabilities to avoid the collision.

Q.2. Critically analyze the importance of effective technical writing in addressing the cybersecurity threats. How can written communication be used to inform, instruct, and persuade during crisis situations? Substantiate your answer with the help of relevant examples.

CLO2 – C3 (10 Marks)

- Q.3. Revise the following paragraph to improve its structure and clarity. Ensure that the revised version follows sentence strategies used to achieve a good technical writing style.

CLO1 – C2 (10 Marks)

Proposals are commonly used in the field of retail management. These recommendations are written in a standard format, which has a number of company parts that we often use. These are stating the problem, a section often used first in the proposal. Another one is providing a solution, of course, to the problem that you had. You write a proposal if you want to knock out a wall in your department. You also write a recommendation if you want to suggest a solution that a new department be added to your store. Another section of the proposal is the explanation of the end results. You could also write a proposal if in the situation you wanted to implement a new merchandise layout. A major topic involved with writing proposals is any major physical change throughout the store. A proposal can be structured so as to enable implementation of any major physical changes to the upper management level, who would be the audience for which the proposal is intended.

- Q.4. 'Technical writers use design to help their readers both find information and understand it' Revise the following text to illustrate the use of basic design strategies for appearance such as by using headings, chunks, visual aids, and hyperlinks.

CLO4– C3 (10 Marks)

In the field of cybersecurity, it is often the case that professionals are required to engage in the process of continuously monitoring various systems in order to make sure that potential threats are identified at the earliest possible opportunity. This ongoing activity is something that demands not only technical expertise but also the ability to respond in a timely manner to any incidents that may possibly occur. Furthermore, it is important for cybersecurity teams to have clear and detailed communication with one another so that misunderstandings that could lead to system vulnerabilities can be effectively avoided.

- Q.5. Convert the information given in the paragraph into a clear and well-organized table. Using the information from the table, write a short paragraph to your manager recommending that the company should start or not start a recycling program. Refer to specific figures from the table.

CLO4 – C3 (10 Marks)

The company can recycle 100 pounds of aluminum per week. The current rate for aluminum is 25¢ per pound. This rate would earn the company \$25 per week and \$1200 per year. The company can also recycle 200 pounds of paper per week. The current rate for paper is 5¢ per pound. Recycling paper would earn the company \$10 per week and \$520 per year. The total earnings from recycling are \$1720 per year.
